

PROMET OFFICE

**LAMINATED CHIPBOARD
OFFICE FURNITURE**

COLLECTION FEATURES

CABINETS NW

The cabinets body and doors are made of 18 mm thick laminated chipboard. Tops are made of 25mm thick laminated chipboard, with a 2 mm laser ABS edge polymer functional layer, which provides a zero seam effect and improves the moisture resistance and heat resistance.

- Ergonomic metall door handles
- Frosted glass with a thickness of 4 mm in an aluminum frame

* by request

The body and the back wall of the cupboards are made of 18 mm thick chipboard and are joint by eccentric ties. This structure ensures high rigidity that allows the cupboard to be used for zoning office space or to be placed «with their backs» to stationary glass partitions.

Hettich Interimat hinges (Germany) with an opening angle of 110° with door closers for smooth closing of doors. The hinges are of high quality, have been tested and withstand at least 80,000 opening cycles.

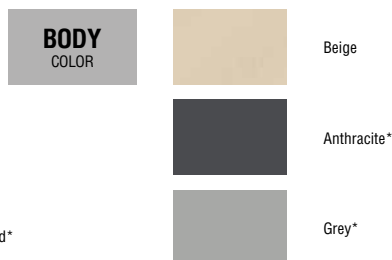

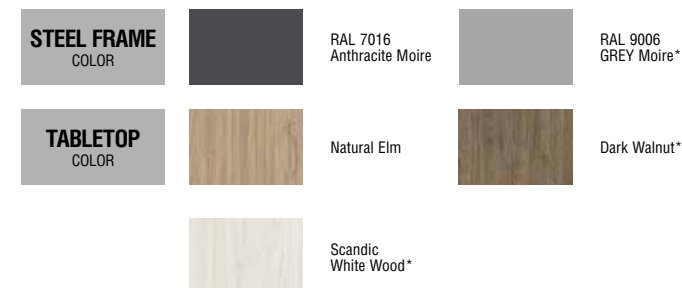

TABLE NT

Office tables on metal structure are convenient and reliable in operation, have an extended service life and an attractive appearance. The design allows you to form both a separate workplace and multiseat workstations for two, four, six or more employees.

* by request

TABLETOPS are made of environmentally friendly laminated chipboard, with a laser ABS edge 2 mm thick with a polymer functional layer. It provides zero seam effect and improves the moisture resistance and heat resistance of product elements.

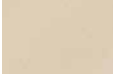

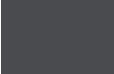

U-shaped metal supports made of pipes with a cross section of 60x30 mm, with hidden height adjustment to compensate for floor irregularities, the effect of a "floating" countertop. The rigidity of the structure is provided by a unique system of metal frame elements of its own design. Two color options are metallic gray moire and dark gray anthracite moire.

MOBILE PEDESTAL NPW

The pedestal body and front panels are made of 18mm laminated chipboard, with a laser ABS edge with a thickness of 2 mm with a polymer functional layer, which provides a zero seam effect and improves the moisture resistance and heat resistance. Chipboard top with a thickness of 25 mm, laser ABS edge with a thickness of 2 mm.

COLOR	 Beige	 Grey*	 Anthracite*
FRONT PANEL COLOR	 Natural Elm	 Dark Walnut*	 Scandic White Wood*

* by request

Ball-bearing slides with full extension – are durable and silent, provide a soft movement of the drawers regardless of the load.

The stationery tray in the pedestal allows you to keep small items necessary for work in order and at hand, such as pens, pencils, paper clips, stickers, etc.

Wheel supports with a stopper block the pedestal in a stationary state during operation.

THE PECULIARITY OF THE COLLECTION IS THE RATIONALITY AND EFFICIENCY OF WORKING AREAS

It is a set of furniture that helps you to create unique workplaces and storage systems in different rooms, starting from workrooms and ending with office spaces of any size. The variety and capacity of storage systems allows you to rationally and efficiently organize the workspace.

The furniture is made of environmentally friendly laminated chipboard. Office tables on U-shaped supports made of metal pipe with a cross section of 60x30 mm, convenient and reliable in operation. The rigidity of the structure is provided by a unique fastening system of metal frame elements of its own design. Two variants of color - gray metallic moire and anthracite moire.

For accurate placement of wires and network filters under the table, it is additionally possible to install cable channels in the form of trays.

They are performed in two types:

- welded – **NT(G)**
- steel sheet colored as the supports – **NT(S)**

- Table NT 140x70 Natural Elm/anthracite – 4 pcs.
- Side pedestal NPW-407 L4 Natural Elm/Beige – 4 pcs.

- Table NT 140x70 Natural Elm/anthracite – 4 pcs.
- Mobile pedestal NPW-406 L3 Natural Elm/Beige – 4 pcs.

QUALITY, CONVENIENCE AND FLEXIBILITY OF THE ORGANIZATION OF WORK AREAS

Staff furniture allows you to create a modern and functional office space. Workstations will be the ideal solution to this problem. Such desktop systems, united by a common frame with or without additional partitions, save space and money, set the overall style of the room and increase the functionality of the work area.

Workstations can be assembled into multi-seat workstations for two, four, six or more employees.

- NT workstation 280x144 naturalelm/anthracite – 1 pcs.
- Screen NT 140 Natural Elm – 2 pcs.
- Wardrobe NWT 144x75 natural/beige elm – 1 pcs.
- Mobile pedestal NPW-406 L3 Natural Elm/Beige – 4 pcs.

- Workstation NT 320x144 Natural Elm/anthracite – 1 pcs.
- Panel NT 140 Natural Elm – 3 pcs.
- Mobile pedestal NPW-406 L3 Natural Elm/Beige – 6 pcs.

Zoning of workplaces with the help of chipboard panels.

Additionally, metal protective panels/painted in the color of a metal frame or screens and panels made of chipboard with a thickness of 18 mm can be installed on the tables. Fastening to tables by means of metal brackets of unique design of own development.

LIGHTNESS, FUNCTIONALITY AND MODERN DESIGN

The furniture for the executive's office combines practicality and elegant design. Pieces of furniture selected in the same style will emphasize the importance of this space, create convenience and comfort. Lightness of cabinet designs and «floating» tabletops create a sense of visual

lightness and weightlessness. Thoughtful proportions and clear lines combined with high-quality materials set the business tone for any room.

IMPECCABLE PROPORTIONS, CONCISENESS AND RESTRAINT

An integral part of any office is a meeting room. And the outcome of meetings and negotiations with clients or partners largely depends on how it is equipped. The interior of the meeting room is decorated in the same style as the rest of the premises in the office, the central element of which is a meeting table. Depending on the intended number of participants in meetings and partners who will sit at the table at the same time, its dimensions are determined.

We offer a modular system of meeting tables. Our tables are rectangular or square in shape, from which, with the help of common (intermediate) supports, you can create compositions of any length and width.

With the help of hidden adjustable supports, it is possible to compensate for the unevenness of the floor.

RELIABLE DESIGN, QUICK ASSEMBLY AND MODEL RANGE EASY OPERATION

CLOTHS LOCKER is an excellent option for the equipment of locker rooms and storage rooms in industrial and public premises: dormitories, schools, hypermarkets, medical institutions and fitness center.

WHAT GIVES YOU SAFETY?

The highlight of our furniture is vandal-proof fittings: Hettich Intermat hinges with an opening angle of 110°, a key «Praktik», secrecy of 2000 combinations or an electromechanical lock with a bracelet model VEM126. This type of lock is very convenient to use, and performs two functions: a lock and a handle.

KEY LOCK

The key lock «Praktik» (2000 combinations). There are 2 keys included. The probability of meeting two cabinets with the same locks is minimal.

ELECTRONIC LOCK VEM126

Powered by 4 AA 1.5V batteries, reading range < 1 m. Operating time from a set of batteries: 10000 openings or about 2.5 years in standby mode. Access by: card, bracelet, tag, etc.
